Objectives

Passionate about solving complex problems, automating infrastructure, and improving system reliability in on-prem and cloud environments. Committed to staying up-to-date with the latest IT trends and tools to deliver secure, scalable, and innovative solutions.

Experience

AWS Cloud Apprenticeship – Adex International

2025-06 – 2025-07

- **Certified AWS Solution Architect – Associate (SAA-C03)**
- **Serverless Image Processing Pipeline** [S3, Lambda, API Gateway, DynamoDB, CloudFront]
- **Architected a secure multi-tier VPC** with public/private subnets, bastion host & DB layer [VPC, EC2, RDS, Security Groups, NACL]
- **Implementation of a real-time analytics platform** [Kinesis, S3, Glue, Athena, QuickSight]
- **Deployed a HA website with load-balancing, auto scaling and monitoring for fault tolerance** [EC2, ALB, Auto Scaling, Route 53, CloudWatch]

CAS Trading House

2019 - Present

- Implemented a **centralized code repository** using **GitLab** to standardize code management and improve collaboration across development teams.
- Spearheaded the **first DevOps initiatives** in the company, driving automation and modern deployment practices.
- Designed and implemented **CI/CD pipelines using GitLab & Jenkins**, streamlining build, test, and deployment processes.
 - **Dockerized** a monolithic application and re-architected it into **microservices**, enabling independent deployment and scaling.
 - Use **Multi-stage Docker builds** to reduce image size and improve build efficiency.
 - **Reduced CICD time from nearly 2.30mins to just seconds**
- Automated various manual operational tasks using **Ansible**, significantly reducing manual efforts and improving consistency.

- **Implemented CI/CD pipelines** using *GitLab* or *Jenkins*, automating **build, test, and deployment** workflows for faster and reliable releases.
 - Integrating with **SonarQube** for automated code quality checks
- Set up a **QA automation pipeline using Selenium**, enabling faster and more reliable application testing.
- **Provisioned infrastructure** using **IaC tools** such as *Vagrant* and *Terraform*, automating VM creation and cloud resource management.
- Deployed and configured a **Kubernetes** cluster on-premises using **kubeadm**.
- Deployed and maintained **Zabbix** for infrastructure and application monitoring, automating error detection and configuring alert notifications to the respective teams for faster issue resolution.
- Provided specialized technical support and solutions in the **Identity Governance and Administration (IGA)** domain, with hands-on experience in **Symantec IGA (Broadcom)** for identity lifecycle management and access governance.

Education

Advance College of Engineering & Management, Balkhu

- Bachelors in Computer Engineering

Skills

- AWS (EC2, S3, VPC, Lambda, CloudWatch, IAM, RDS)
- Kubernetes (Ingress Controllers, MetalLB, Storage Classes)
- Docker, Docker Compose, Containerization
- CI/CD (GitLab, Jenkins, GitHub Actions, ArgoCD)
- Infrastructure as Code (Terraform, Ansible, CloudFormation)
- Git & Version Control
- Code Quality & Security Tools (SonarQube, Trivy, Gitleaks)
- Monitoring & Alerting (Zabbix)
- Cloud & On-Prem Automation

Programming

- Python
- Go
- Bash
- Java
- JavaScript

Personal Projects

1. GitOps Project

- a. Implementation of CICD in Gitlab
 - Build Application
 - Run Test
 - Build & Push to Container Registry
 - Update Helm Charts
 - Push Updated Helm Charts
- b. Implementation of **ArgoCD** to fetch changes in the gitlab repository and deploy to Kubernetes cluster.
 - Configured **MetalLB** for load balancing and configured **Ingress Controllers** to manage external access to services.

2. DevSecOps Project

- a. Implementation of CICD in Jenkins
 - Clone to Repository from Github
 - Build Project
 - GitLeaks [Check for Sensitive Information]
 - Sonarqube []
 - Trivy
 - Build & Push Image to Container Registry
- b. Deploy the changes to Kubernetes Cluster
 - Access the application with help of Ingress Controller & MetalLB

3. APM for Newgen and Finacle System using Zabbix and Grafana

- a. Monitoring System and its health information
- b. Monitoring Frontend application's Services (WebSphere) and states
- c. Monitoring Backend Finacle Services
- d. Monitoring Oracle Database Service

4. Customization of **Open-Source** Project to use in self-business **[IN USE]**

- a. Use of Frappe Books [Accounting & Billing]
- b. Removed unwanted features & added necessary one
- c. Integrated print out of the bill similar to department store

Certificates

- **AWS Certified Solutions Architect – Associate** [AWS, 30th June 2025]
- CKA Certification Course - Certified Kubernetes Administrator – [KodeKloud, 2025]
- Kubernetes for the Absolute Beginners – Hands-on Tutorial – [KodeKloud, 2025]
- Docker Training Course for the Absolute Beginner - [KodeKloud, 2025]
- DevOps Pre-Requisite Course - [KodeKloud, 2025]
- RHEL Bootcamp – RHEL 9 – [N9 Solution, 2024]
- Meta – Programming in Python – [Coursera, 2024]
- Meta – Version Control – [Coursera, 2024]
- Meta – Introduction to Databases for Back-end Development – [Coursera, 2024]
- OpenAI, GPT3, Codex – Certificate of Completion - [lablabai, 2022]
- AZ-500: Microsoft Azure Security – [Styava, 2022]
- The Python MicroDegree: From Basics to Building Python Apps – [Udemy, 2021]
- Certificate for participation [Yomari Codecamp, Locus 2020]
- Python with AI [Sudreeshya IT Training Academy 2019]
- Java Programming Certificate [Broadway Info Sys 2018]
